

BRINGING SAFETY TO PEOPLE®

Decal Installation

- IMMI decals alert rescue workers that the apparatus is equipped with IMMI advanced occupant restraints.
- The IMMI system includes components that can pose a safety risk to rescue workers during the extrication process. IMMI decals assist rescue workers in locating these components.
- Read the following instructions and install the decals as outlined in steps 1 thru 6. Be sure the areas are clean and dry, free of dirt, oil, wax or loose paint.

- 1** Peel strip on back of decal to expose adhesive.
- 2** Adhere two "IMMI SRS Equipped" decals on vehicle *exterior*, one near the driver's door (**A**) and one near the first officer's door. **Do not place decals on window.**
- 3** Adhere four "IMMI SRS Equipped" decals on vehicle *interior*, one on the lower portion of the driver's door (**B**) and one on the lower portion of the first officer's door and one on each of the rear doors.
- 4** Adhere the "SRS System Locator" decal to the driver-side sun visor (**C**), on the roof liner just above the visor so that the label is visible when the visor is flipped down or on the window if label is a window cling.
- 5** Apply decals firmly with the palm of hand, starting in the center and working outward to remove trapped air.
- 6** Wait 72 hours before washing the vehicle or exposing it to rain/excess humidity.

- 7** Place Emergency Response Guide with the owner's manual.

NOTE: Label B is placed on the interior of the doors!
