

BRINGING SAFETY TO PEOPLE®

Decal Installation

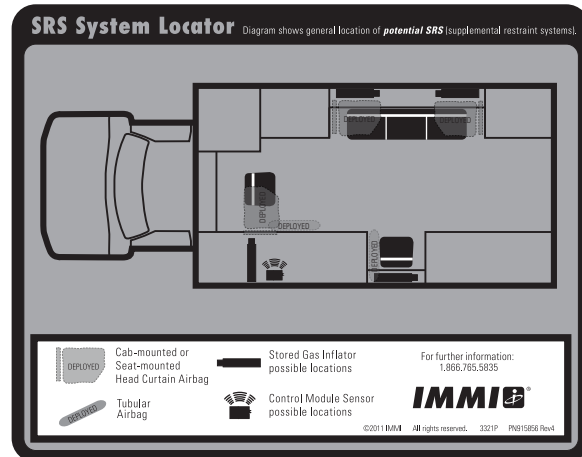

- IMMI decals alert rescue workers that the vehicle is equipped with IMMI advanced occupant restraints.
- The IMMI system includes components that can pose a safety risk to rescue workers during the extrication process. IMMI decals assist rescue workers in locating these components.
- Read the following instructions and install the decals as outlined in steps 1 thru 5. Be sure the areas are clean and dry, free of dirt, oil, wax and loose paint.

1 Peel strip on back of decal to expose adhesive.

2 Adhere two “IMMI SRS Equipped” decals on vehicle exterior, one beside the side doors and one near the back doors.

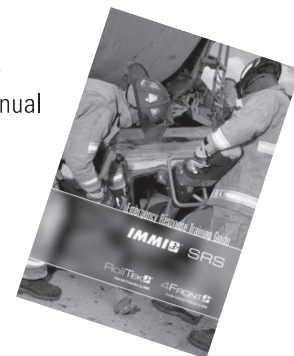

3 Adhere the “SRS System Locator” decal to the inhalation cabinet.

4 Apply decals firmly with the palm of hand, starting in the center and working outward to remove trapped air.

5 Wait 72 hours before washing the vehicle or exposing it to rain or excess humidity.

6 Place Emergency Response Guide with the owner’s manual in the vehicle.
