

### Side Roll Airbag Protection

**Side Roll Airbag (SRA)**  
Deploys to cushion head and neck

**RollTek Sensor**  
Detects an unrecoverable roll and sets into motion a series of actions in a fraction of a second

**Seat Belt Pretensioner**  
Keeps the driver and/or passenger in their seat

**Suspension Seat**  
Is pulled down to its lowest level to increase survivable space

Sears Seat with RollTek

More than 50% of heavy truck driver fatalities happen in a rollover. That's more than HALF.

With a high center of gravity and a constantly shifting load, concrete mixers are at an increased risk for this kind of accident. That's why IMMI® created RollTek®, a side roll airbag protection system that can give your drivers a better chance to walk away from one of the worst kinds of crashes they can face.

# RollTek - How It Works

A roll sensor monitors the truck's position, and when a rollover is detected, up to three RollTek components are deployed per seating position

- 1. Seat pretensioners keep the driver or front seat passenger securely in their seats.

- 2. Suspension seat is pulled down to its lowest level to increase survivable space in the cab.

- 3. Side airbag deploys to cushion the head and neck.

## Availability

RollTek with the Sears Seat is available through these quality truck manufacturers:

### Heavy Duty Truck

Peterbilt: 567, 367, 365

Volvo: VHD

Kenworth: T880

MACK: Granite

Western Star: 4700, 4800, 4900

### Medium Duty Truck

Peterbilt: 348, 548

Kenworth: T480

## Testing

IMMI extensively tests its safety products at CAPE, the premier testing house for the commercial truck industry.
