

Frontal Crash Airbag Protection

4Front Frontal Crash Airbag
Large surface area when deployed to protect head and neck

IMMI Steering Wheel with Integrated Airbag

Sensor*
Triggers the DAB (Driver Airbag)

* Component will vary according to application

You can do your part to reduce fatalities and injuries in a frontal collision by providing drivers with the same protection we have in our cars. Airbags make a difference. **IMMI's 4Front** deploys in a fraction of a second from the steering wheel to protect drivers from severe injuries.

What's Going on Inside

Testing

IMMI extensively tests its safety products at CAPE®, the premier testing house for the commercial truck industry.

Whether it is a remote control roll, a test on the 90° dynamic rollover impact machine, or a barrier test conducted on the largest known barrier block in the world, CAPE tests the occupant restraints and product performance while capturing real world crash sensor data.

Our findings have led to significant advancements in safety for the industry and the men and women who drive it forward.
